

Setting up Parent Accounts on Schoology

Open Internet Explorer or Google Chrome and enter www.schoology.com. Either will work, but using Chrome is recommended 😊.

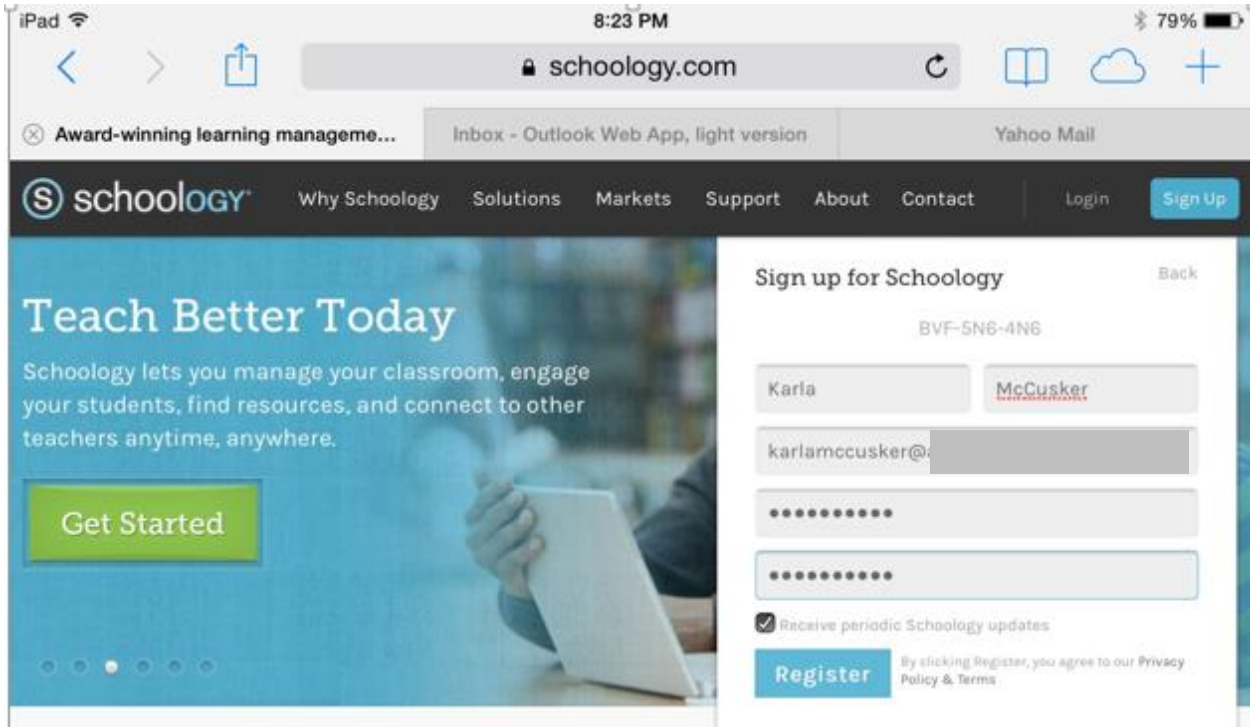

1. Click "Sign Up"
2. Click "Parent"

- Schoology will ask you to input an access code. Enter the access code you received in your child's first period class.
- Parents need ONE access code to gain access to ALL of your child's classes.

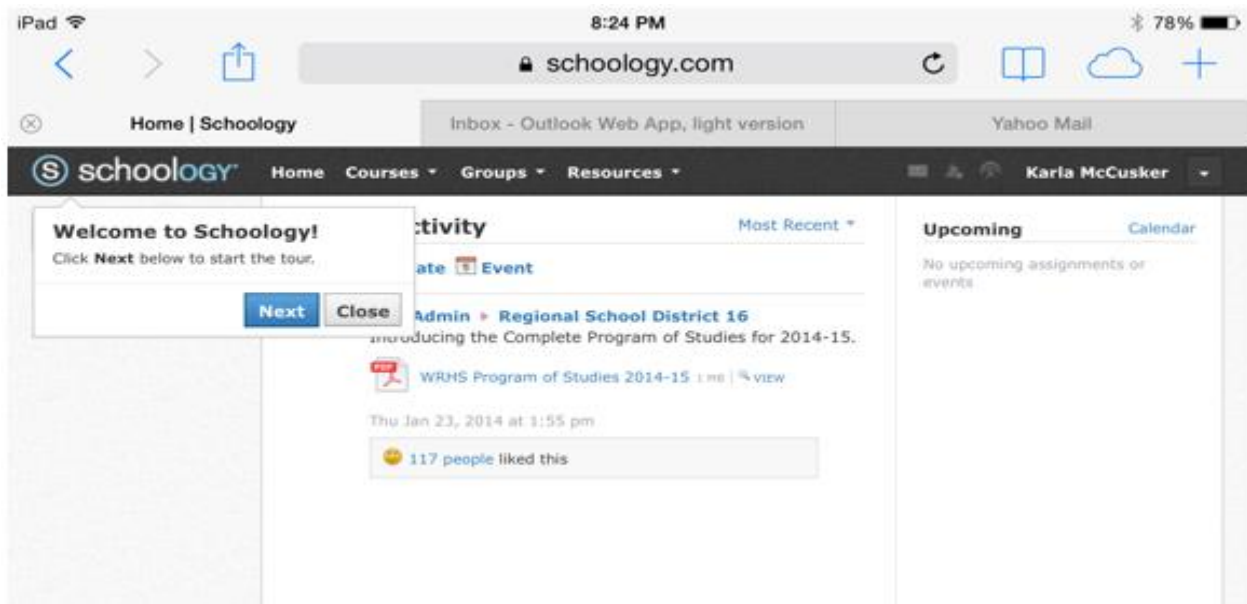

- Access codes must be input exactly as they are given: include all capitals and

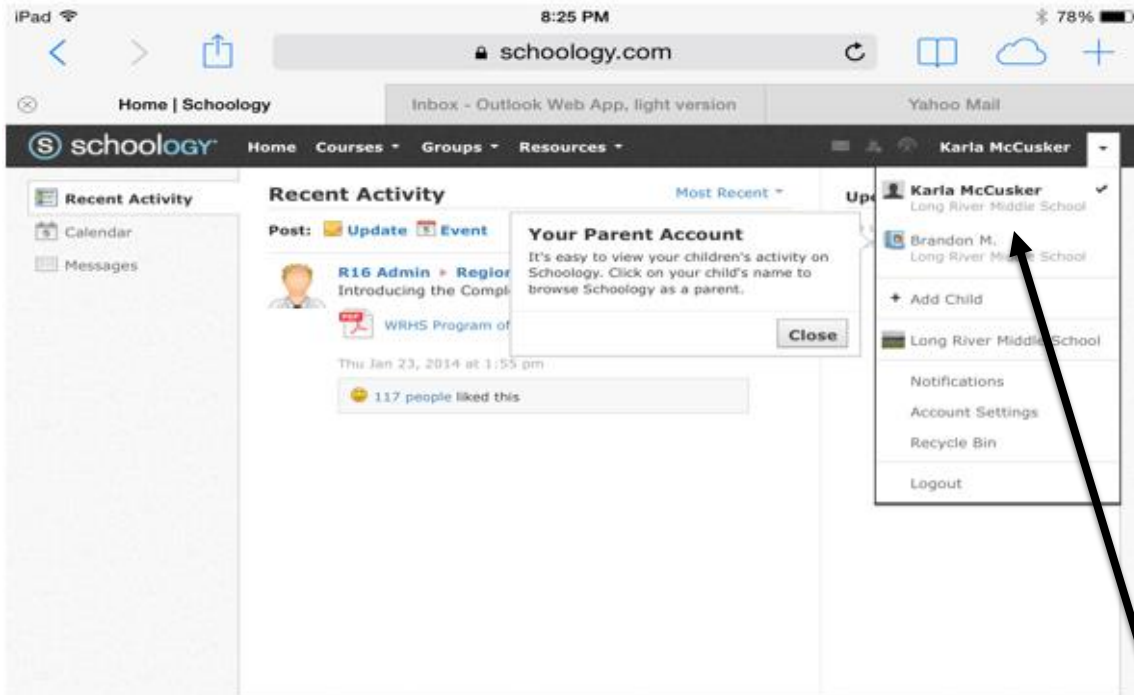

hyphens (dashes).

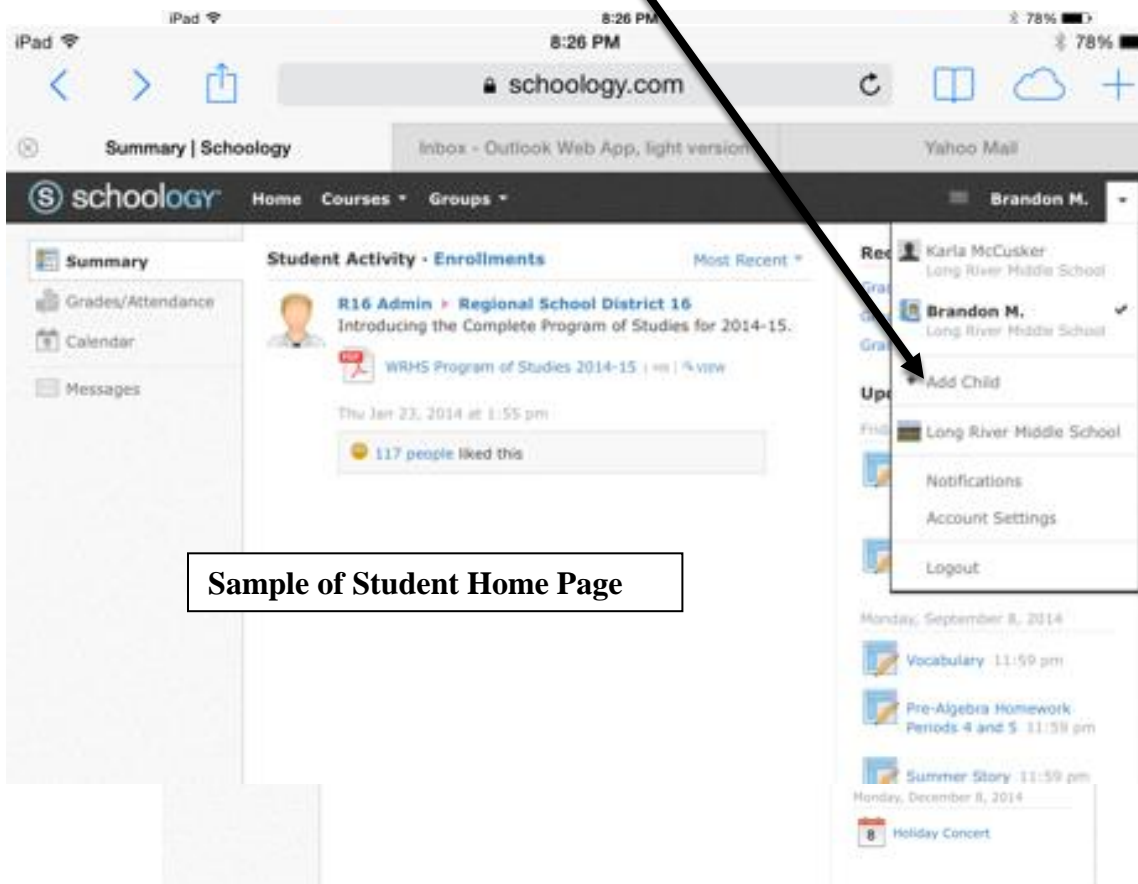

- Schoology will prompt you to input your name, email, and to create a password.
- Click "Register."

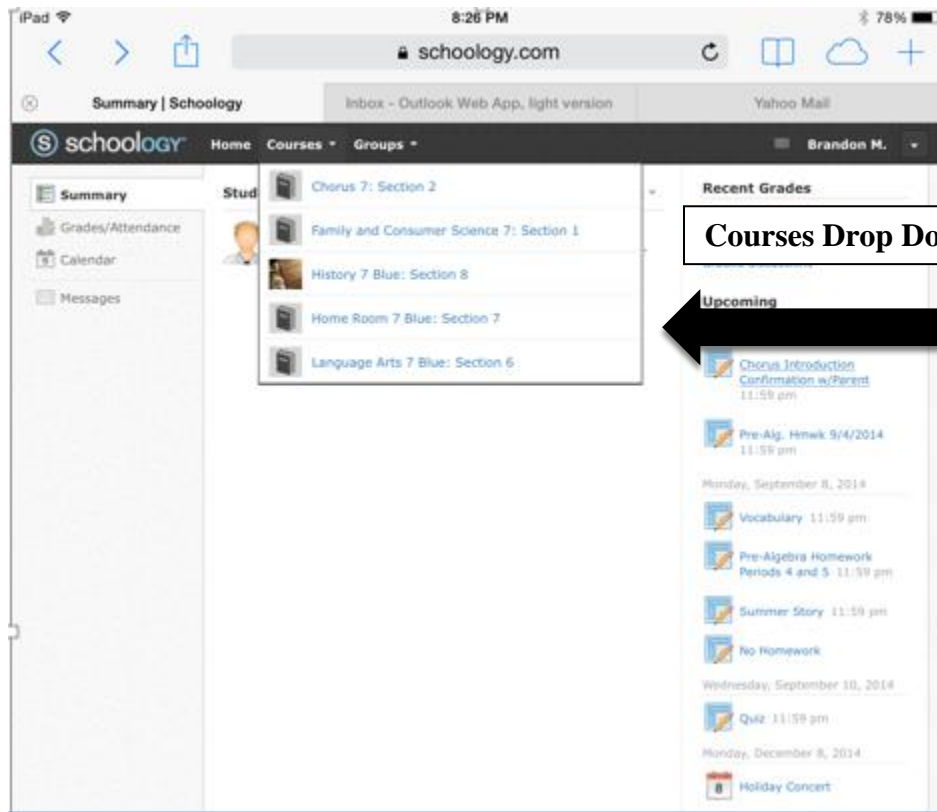

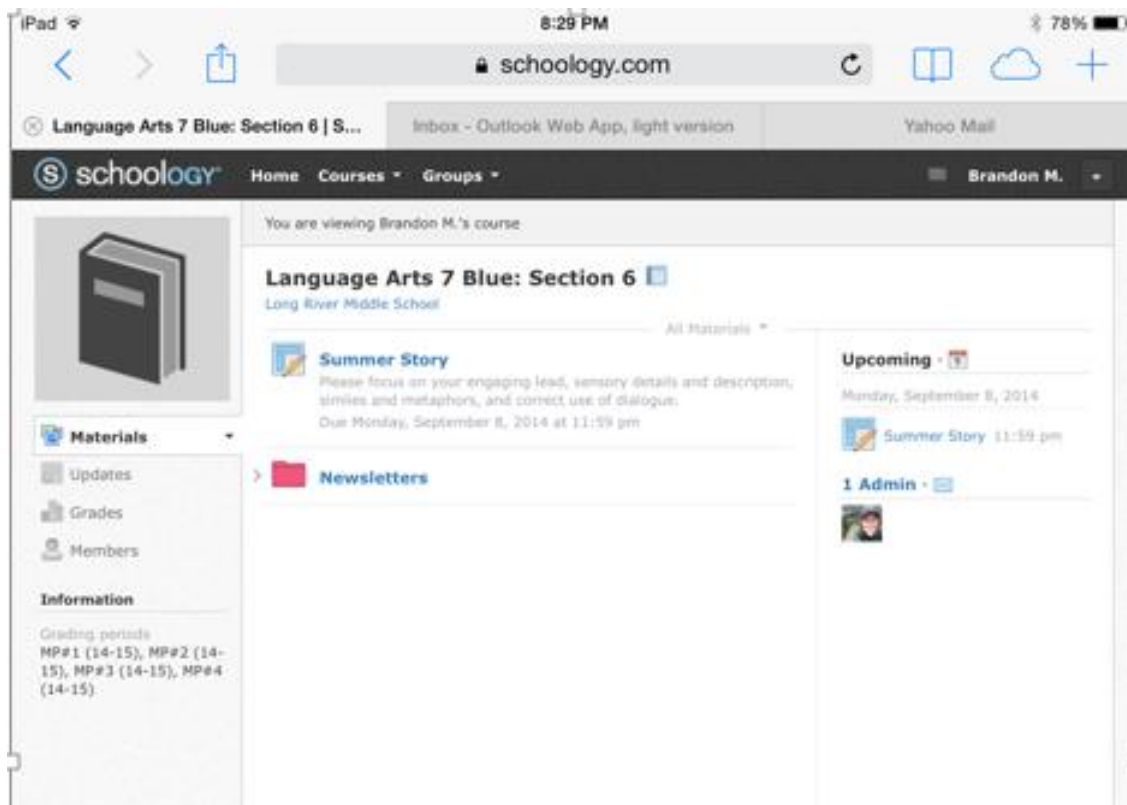

- Schoology will invite you to take a tour (optional).

- Parents will be able to switch between their account and view their child's account.
- Parents can add a second child with a different access code.

**Sample Student Course Page
(Language Arts)**

Important!

- Parents will continue to log into their accounts from www.schoolology.com . Students will need to log in at <https://region16.schoolology.com>.
- Power School and Schoolology are two different accounts. Use your Power School to access your child's grades, and use Schoolology to see their assignments. This is the same as when it was Power School and Edline, but Schoolology has replaced Edline.
- Please do not hesitate to email me with questions!
Jim Amato jamato@region16ct.org (unless you sign in to Schoolology; then you can message in there ;)

Important Access Codes

When joining a group it is important to enter the access code exactly, with capitals and the hyphen in appropriate places. Parents, in order to join groups make sure you are viewing your parent account and not your child's page.
